By the numbers: Medicare Part D

458,489	Medicare Part D beneficiaries in Connecticut ¹		
140,796	Beneficiaries enrolled in Medicare Advantage prescription drug plans in 2015 ²	317,693	Beneficiaries enrolled in stand-alone prescription drug plans in 2015 ⁴
27	Number of Medicare Advantage plans available in 2016 ³	26	Number of Part D Plans available in 2016 ³
36%	Beneficiaries receiving Part D's Extra Help in 2016 ³	\$18.40	Lowest monthly premium for a prescription drug plan in 2016 ³
18%	Medicare beneficiaries as a percent of state population in 2015 ⁵	92%	Beneficiaries with access to Part D plan with lower premium than what they paid in 2015 ³

In 2014, 82% of Medicare beneficiaries in Connecticut were white, 8% were black and 7% were Hispanic.⁶

Medicare Part D is working well for beneficiaries and taxpayers...And it's getting better.

- Several surveys show that about 90% or more of Part D enrollees are satisfied with their coverage and say that their coverage works well.⁷
- In 2016, one third of all Part D plans nationwide have no deductible.⁸
- Total Part D costs are 45%, or \$349 billion, less than initial projections for 2004-2013. Additionally, Part D drug spending was just 11.8% of total Medicare spending in 2015.⁹
- CBO changed its scoring methodology to reflect evidence that increased prescription drug use leads to offsetting reductions in Medicare spending for other medical services.⁸
- Part D helped expand drug coverage and improve adherence to medicines; gaining Medicare Part D prescription drug coverage was tied to an 8% decrease in hospital admissions for seniors overall, with higher reductions for certain conditions.¹⁰
- A growing body of research finds reductions in mortality following the implementation of Part D. One study found, since the implementation of Part D in 2006, nearly 200,000 Medicare beneficiaries have lived at least one year longer with an average increase in longevity of 3.3 years.¹¹
