## By the numbers: Medicare Part D

103,432	Medicare Part D beneficiaries in Vermont in 2018 <sup>1</sup>		
9,514	Beneficiaries enrolled in Medicare Advantage prescription drug plans in 2017 <sup>2</sup>	91,275	Beneficiaries enrolled in stand-alone prescription drug plans in 2017 <sup>4</sup>
8	Number of Medicare Advantage plans available in 2018 <sup>3</sup>	22	Number of Part D Plans available in 2018 <sup>3</sup>
31%	Beneficiaries receiving Part D's Extra Help in 2018 <sup>3</sup>	\$12.60	Lowest monthly premium for a prescription drug plan in 2018 <sup>3</sup>
21%	Medicare beneficiaries as a percent of state population in 2015 <sup>5</sup>	80%	Beneficiaries with access to Part D plan with lower premium than what they paid in 2017 <sup>3</sup>

Medicare Part D is working well for beneficiaries and taxpayers...

- Surveys show that more than 8 in 10 Part D enrollees are satisfied with their coverage and say that their coverage works well.<sup>7</sup>
- In 2018, one third of all Part D stand-alone plans nationwide have no deductible.<sup>8</sup>
- Total Part D costs were 45%, or \$349 billion, less than initial projections for 2004-2013. Additionally, Part D drug spending was just 13.6% of total Medicare spending in 2018.<sup>9</sup>
- CBO changed its scoring methodology to reflect evidence that increased prescription drug use leads to offsetting reductions in Medicare spending for other medical services.<sup>10</sup>
- Part D helped expand drug coverage and improve adherence to medicines; gaining Medicare Part D prescription drug coverage was tied to an 8% decrease in hospital admissions for seniors overall, with higher reductions for certain conditions.<sup>11</sup>
- A growing body of research finds reductions in mortality following the implementation of Part D. One study found, since the implementation of Part D in 2006, nearly 200,000 Medicare beneficiaries have lived at least one year longer with an average increase in longevity of 3.3 years.<sup>12</sup>
